• Minimizes need for researchers to maintain multiple copies of their profile with multiple systems.

• Ensures a clearinghouse exists which fosters the easier interchange of profile data.

• Allows a service like Pivot to focus on how we can employ profiles to make other tasks (for example - finding funding and research collaborators - easier).

CV Page: http://www.scholars.northwestern.edu/expertAddInfo.asp?n=Mark+Her...

Expertise: Nanomaterials for Electronics, Sensing, and Energy
The Hersam Research Group applies the fundamental paradigm of materials science and engineering (i.e., the development of structure-property-processing-performance relationships) to hybrid hard and soft materials at the nanomotor length scale. In many cases, the objective is to apply organic molecules to inorganic substrates in an effort to increase the functionality of the resulting hybrid system (e.g., silicon-based molecular electronics and more)

We've added a new option for admins when configuring their Pivot Gallery website - you can now exclude profiles by role (i.e., grad student, undergraduate student, Emeritus, etc.) as well as determine how results lists display (by name or by relevance). When you are in the "Manage Gallery" area, you'll now see a third option in the left-hand navigation called "Filter & Sort" where you can manage both options.
